

## Using Computers To Run & Grow Your Business

Do you use computers in your business? Are they running well? Is it time to upgrade? Do you have internet related business needs? Are you thinking about change, optimizing, streamlining or expansion? – If you answer 'YES' to any of the above, then we are here for you! When did you last talk to a consultant about your business systems?

### Introducing The.DLPI.net

Data Link Pacific, Inc. on Maui helps you grow your business through a strategy that fits your needs. By identifying where to streamline your business, you can run it more efficiently, thereby freeing up valuable time.

We offer services such as strategic consultation on computer information technology (IT) systems, infrastructure improvement, workflow planning, e-business, and corporate image development. We also offer the latest in mobile technology so you and your staff can do business from anywhere (see reverse side for more).

### Outsourcing Saves You Money

We have helped a great number of businesses achieve a higher level of technology usage through consulting, implementation, tutoring, service & maintenance. For a lot of business owners it is not feasible to hire full time technology staff. By outsourcing your Information Technology (IT) management, your business runs at peak performance while the cost is kept down.

We bring 15 years of business experience to Hawaii from Denmark. IT is our specialty to aid in continuously strengthening your business in a modern high tech society. That is our business, and we do it well.

### Telecom & Information Technologies (IT) are Great Tools to Run and Grow a Modern Business.

## Drop The Wire!

Go wireless with the latest state-of-the-art products for PC's & Mac's.

**WebBook™** is the smallest wireless laptop on the market today, weighing a mere 27 ounces.

**WebBox™** is the latest wireless credit card sized cell-phone adding phone, internet, SMS text messaging & fax to existing PC & Mac laptops.

**SurfPoint™** is a heavy-duty ZERO maintenance wireless computer with embedded Windows XP™, easy to set up; just plug it in.

## Feel Free, Go Mobile!

In order to work productively in today's world it is important to be connected to the internet whenever and wherever you are. Now enjoy the convenience of communication using the latest in wireless networks. Access information online, remote access your desktop computer, send emails, and print documents before arriving at your location.

### WebBook™ - Smallest Wireless Laptop

The **WebBook™** compact mobile computer measures a mere 8.8" by 5.3" and weighs a feather light 27 ounces. It features a bright 7" high resolution (800x480) touch screen monitor, has a built-in tri-band GPRS (General Packet Radio Service) cell phone module, wired internet plug and CF-card slot for flash memory (64 MB included) or WiFi (optional). **WebBook™** runs Windows CE.net from 128 Mb built-in flash memory, has internet browser, MS Office viewers, media player, remote desktop, terminal services, Citrix mainframe client, and it runs GoToMyPc.com, a popular remote access service.

### WebBox™ S10 – A Cell Phone for Laptops

**WebBox™** is the latest wireless add-on card; adding phone, internet, text messaging & fax capability to existing laptops. This credit card sized tri-band GPRS PC-Card includes easy management software with phonebook, support for hands free dialing, and works out of the box with Mac OSX10.3, Windows XP & 2000 operating systems.

### SurfPoint™ ZERO Maintenance Windows XP

**SurfPoint™** ZERO maintenance internet station is easy to set up; just plug it in! **Surfpoint™** is "crash proof", based on industrial hardware and Windows XP embedded OS, with write protection. No virus problems, no system crashes, no user related failures. - It just works! Its setup can be customized and even updated regularly remotely. With armor glass it is a durable wireless computer with no moving parts & comes with a 3 year warranty. With a sealed chassis this heavy-duty computer is perfect as public terminals in internet cafes, any point-of-sale, and it more than replace the ordinary terminals that often fails and require regular maintenance. The **SurfPoint™** is a real reliable workhorse.

In Hawaii GPRS service is provided by AT&T and T-mobile. WiFi 802.11B is a faster wireless network available at many public places, often referred to as Hotspots. We also provide and set up wireless networks at any location. For more information see [www.dlpi.net](http://www.dlpi.net), email [info@dlpi.net](mailto:info@dlpi.net) or call 281-1169.
